±988 SF MAIN OFFICE PLAN

Area Description

North Valleys submarket is home to national distributors and warehouse users such as Amazon, Petco, Sherwin Williams, Clorox and Urban Outfitters. The area boasts a plentiful workforce and is located on the bus route and minutes from US-395 (the main north-south arterial in northern Nevada) making it an excellent location for a western operations facility.

Business Friendly Environment for Corporate Users

The Tax Foundation ranked Nevada as the third most business-friendly state due to its favorable tax climate, which includes no corporate income taxes, personal income taxes, inventory taxes, unitary taxes, estate and/or gift taxes, franchise taxes, inheritance taxes or special intangible taxes.

Strategic Centralized Logistics Hub

The Reno/Sparks industrial market is strategically located at the epicenter of the western United States, providing a convenient point of distribution for truck, rail and air services. The Reno/Sparks location allows for overnight delivery to the majority of the eleven western states (53 million people) and two-day delivery to over 63 million people via truck and rail freight shipping.
